Prima CARE Mammogram Testing
289 Pleasant Street
Fall River, MA 02721

2017

Dear Dr. [REDACTED]

I am writing to thank you for your expertise in reading my mammograms and suggesting careful follow-up. I was diagnosed with DCIS (Stage 0) breast cancer last August, after you detected calcifications on the films. You were diligent in following me more closely – recommending a six-month re-evaluation with magnification, and I am so grateful since it led to very early detection of the disease.

I have been able to meet with all of the doctors and nurses who have cared for me during this process, so I've been able to thank each in person. Since this was not the case with you, I wanted to express my gratitude through a letter. Again, thank you for being such a skillful practitioner. Your careful work is saving lives.

With genuine appreciation,

[REDACTED]
